<p>STATIC TEXT</p> <p><i>Hello! My name is working with Angkor Research and Consulting. We are currently conducting a survey for the World Bank about access to energy in Cambodia. I will ask about all of the sources of energy used in your household for lighting, cooking, etc. Your answers will only be used for research purposes and will be kept confidential. You can pause or skip any questions at any time during the interview, or ask to clarify any question you do not understand. The interview will take around two hours. and it is not a test, and thus there is no right or wrong answer. However all your answers are important and I want you to answer correctly and tell me the truth. This will allow my team to give good information to the World Bank and help improving your household's access to energy in the future. If you have question about this survey, you can contact to Mr. Khim Sarun via phone number: 023 222 501. Do you have any questions for me?</i></p>

I would like to ask you questions only about the connection fee – getting a wire from the electricity poles to a meter on your house.

If you could pay a “lump sum” price for an electricity connection, in other words, you are offered a price and a period of time to decide whether to take this price. If you decide to take the price, you have to pay all at once, after which you are immediately connected. As you answer the next few questions, assume that all other wiring fees and monthly service fees for using electricity, once you have the connection, remain the same as they are now.>

DO NOT READ: Describe and explain the benefit of having a %STOVENAME% and present its features.
READ: This %STOVENAME% can reduce the smoke and fuel consumption significantly. Your cooking time per meal would most likely be shortened since the firepower of this cookstove is stronger than your current cookstoves. As you answer the next few questions, please keep in mind the various benefits from this device as well as your household budget.
